IRB APPROVAL DATE: 09/17/2021

THE LONGEVITY GENES PROJECT

Are you Ashkenazi Jewish and 95 or older?

Who is eligble?

- Individuals age 95+
- Of Ashkenazi Jewish descent

What's involved?

- A one time visit by the study nurse to your home
- Procedures include medical history, questionnaries about general health, blood tests (including genetic studies), tests of memory and physical function
- There is no cost and all results are confidential
- Results of routine blood tests are provided to participants

The purpose of this research study is to uncover the genetic contribution to healthy aging and longevity
